## Installation of USB Driver:

1. Connect USB cable to the power supply USB interface and the computer USB interface; switch on and in a few seconds dialogue box "Found new hardware wizard" will come out from Windows system (see figure 1 below). If this still doesn't come out, please check whether USB cable is connected correctly or not, whether programmable power supply works well or not. If connection and working are both good, please restart PC and power supply to check if the malfunction can be removed.

Found New Hardware Wizard	
	Welcome to the Found New Hardware Wizard
6 6	Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site (with your permission).
	Read our privacy policy
	Can Windows connect to Windows Update to search for software?
	Yes, this time only
	Yes, now and every time I connect a device
	○ No, not this time
	Click Next to continue.
	< Back Next> Cancel

Figure 1: When connecting power supply and PC with USB cable, dialogue box "Found new hardware wizard" will come out.

2. In the interface of figure 1, please select the first one "Yes, this time only", and then click next to enter figure 2 (see below); at this time, select the second choice and then enter the interface of figure 3.
