Interfejs - programator - emulator zgodny z USB Blaster Altera CPLD/FPGA downloader

Cena brutto	55,00 zł
Cena netto	44,72 zł
Czas wysyłki	24 godziny
Numer katalogowy	LCT-130
Producent	mini moduły

Opis produktu

Interfejs - programator - emulator zgodny z USB Blaster Altera CPLD/FPGA downloader

Interfejs - programator - emulator zgodny z USB Blaster Altera CPLD/FPGA downloader

USB - Blaster download cable performance characteristics:

Stable support embedded SignalTap II logic analyzer features

Support ALTERA company full range of devices. Absolutely all series, don't worry about a device does not support

- CPLD □ MAX3000 □ MAX7000 □ MAX9000 and MAXII ,etc □
- FPGA □ Stratix □ StratixII □ StratixIII □ Cyclone □ CycloneII □ CycloneIII □ ACEX1K □ APEX20K and FLEX10K, etc.
- The serial configuration device □ EPCS1 □ EPCS4 □ EPCS16 □ EPCS64, etc.
- Enhanced configuration device □ EPC1 □ EPC4, etc.

Download supports three modes: the AS, PS and JTAG;

Support and Nios II embedded soft core processor communication and the system debugging, rev. C, the latest version of the firmware! ;

Speed: 6 times faster than the commonly used parallel download line ByteBlasterII;

Easy to use: MiniUSB interface, convenient connection, two status indicators make debugging easier.

Must be: at present, the laptop has almost eliminated parallel port, so commonly used ByteblasterMV and ByteblasterII download line have already cannot be used on a laptop, so for laptop users, choose the USB download line is convenient, but also must.

Fully compatible with ALTERA USB Blaster, usage, function and performance and ALTERA download original factory line.
